Improve client communication using SMS and postal letters.

Enable payment requests through SMS to make it easier for clients to make a payment.

Create automatic reminders to be sent to your client at intervals once the payment has been initially requested via SMS or a letter sent to their address.

Contact clients through a communication method that suits them

Create a sequence of reminders over time to reach clients through a number of different channels

Streamline debt collection and automate follow-ups for late payments, reducing time spent on manual tasks
